

Swiss Commerce was primarily established as a portal for oriental art and as a platform to promote suppliers of high-quality home interior design and office decoration solutions for the benefit of the art industry.

Due to the demand for other non art related business, we expanded our services to serve other online developments for both SC members as well as non members in different industries.

We served political institutions such as the web development for the [Embassy of Japan](#), other service industries like [Hertz Car Rentals](#) as well as in the financial industry for Foreign Exchange designed for [Swiss Forex](#).
